## FERMENTATION PROCESSES DEVELOPMENT

Made in France

# From lab to factory

## CDMO (Contract Development Manufacturing Organization)

*From your principled ideas, your benchtop developments, to routine productions, SYNERGYS BIOSOLUTIONS offers you its expertise in industrial microbiology.*

*All our services (process development, production, quality control...) and industrial means allow the agility required for a successful industrial transfer.*

*Our industrial tools can support your needs from 2 to 5000L.*

### Agility

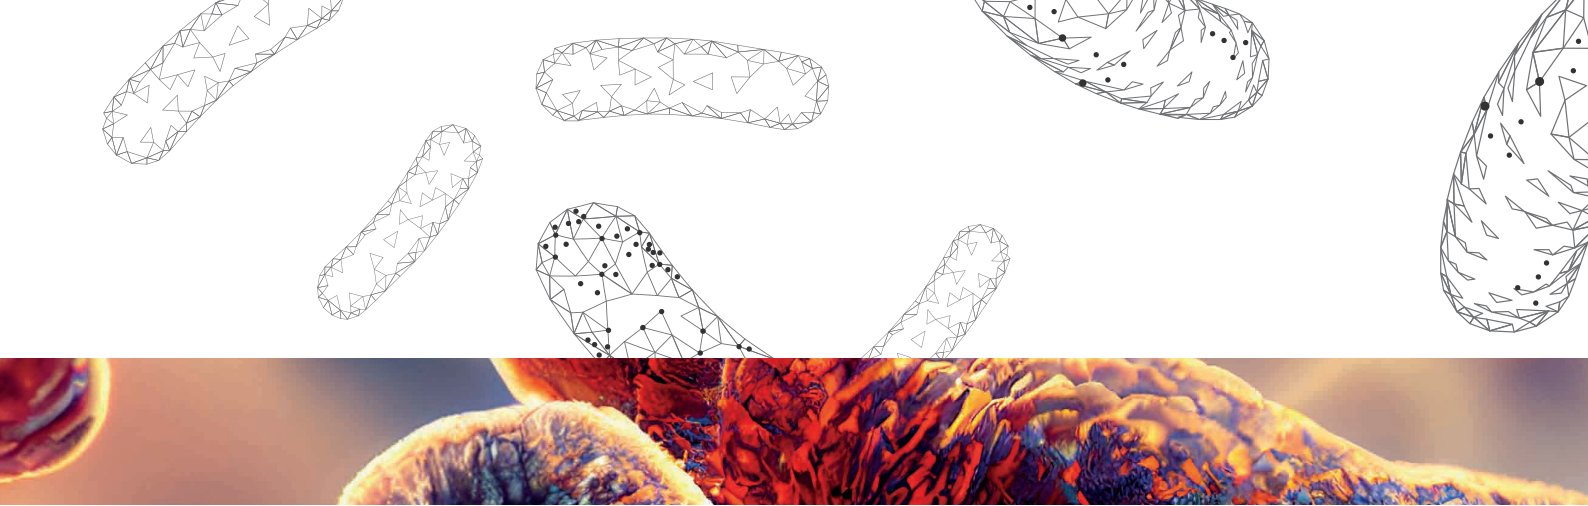

As a force of proposal, we have a great ability to listen and adapt to our clients' needs. Our offer is fully customizable and we have a great expertise of complex projects.

### Expertise

Experts in industrial microbiology, our experience allows us to master numerous microbial genera (bacteria, yeasts, fungi) with aerobic, anaerobic or micro-aerophilic constraints on batch, fed-batch and continuous processes.

### Quality

We guarantee that our products are manufactured according to ISO 22000, FSSC 22000 or GMP standards, from the laboratory to the industrial scale. These certifications are a proof of quality, traceability and safety.

Synergys Biosolutions is the result of **skills sharing** between Greencell and NeoBioSys. This collaboration offers **a double expertise in fermentation** and allows to follow all the steps: from **development** to **industrial batches production**.

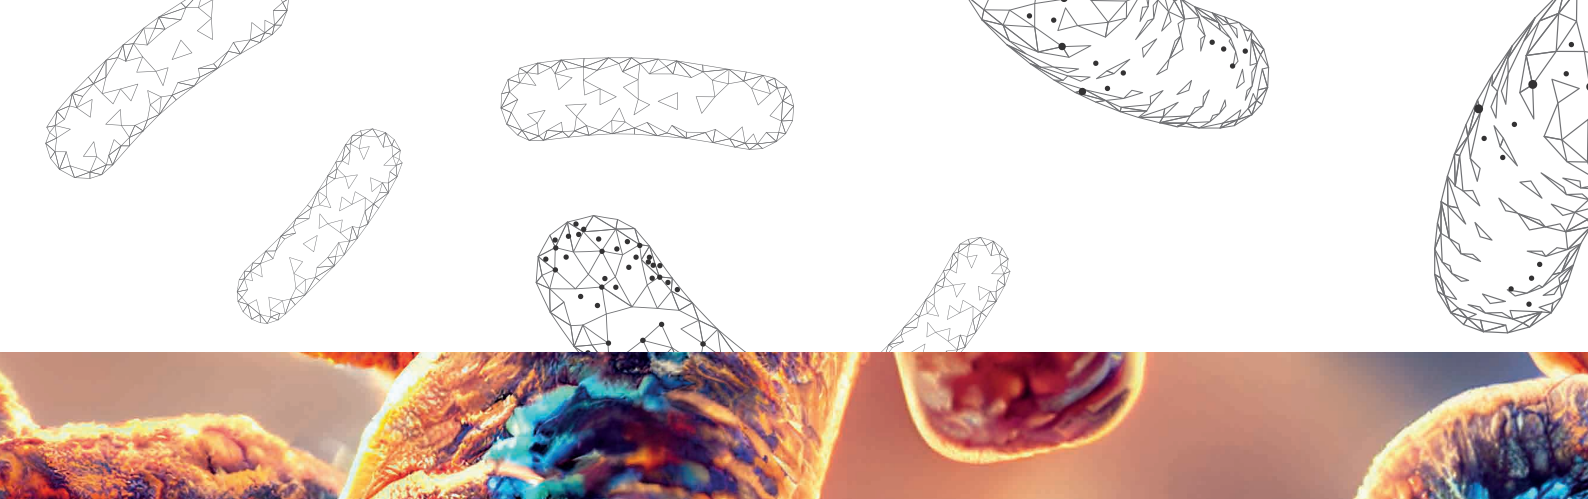

**SYNERGYS BIOSOLUTIONS**

— From lab to factory —

MUTUALISATION

## Who are we?

*Synergys Biosolutions represents the alliance between two giants from Auvergne, France.*

Greencell is a pioneer in **microbiota** research.

A leader in **microbial ecology**, the company produces **micro-organisms** and transforms them into innovative ingredients. For 25 years, Greencell has been a biotechnology pioneer, **expert in industrial fermentation** (solid and liquid).

Our annual fermentation **capacity exceeds 1M litres**.

Since 2009, NeoBioSys has been providing tailor-made **industrial microbiology solutions** to fit its customers' needs.

NeoBioSys provides expertise in the development and scale-up of **bioprocesses** and provides solutions to industrial microbiology issues from research to production.
